AI-native open-source intelligence for mission-critical decisions

COMPANY OVERVIEW

Badger Defense Inc. is an AI-native open-source intelligence (OSINT) company founded by military and intelligence professionals with direct experience in active conflict environments. The platform automates source discovery, monitoring, and credibility assessment, tailored to each client's Priority Intelligence Requirements (PIRs) and Area of Responsibility (AOR). Badger supports military and critical infrastructure clients with intelligence built for operational decision-making.

CORE COMPETENCIES

- **PIR- and AOR-Aligned Source Discovery:** Automated identification of public sources mapped directly to a unit's Priority Intelligence Requirements and Area of Responsibility, replacing manual open-source triage.
- **Real-Time Monitoring and Alerting:** Continuous, automated surveillance of open sources with alerts delivered as relevant events emerge, supporting time-critical decision cycles.
- **Cross-Source Credibility Scoring:** Systematic assessment of source reliability and event credibility through corroboration across independent reporting streams.
- **Multi-Language Situational Awareness:** Near-real-time monitoring across 50+ languages, extending coverage into regions and source sets outside typical English-language collection.
- **Field-Report Fusion:** Integration of on-the-ground field reporting with public-source intelligence to strengthen a unified operational picture.
- **Critical Infrastructure Risk Assessment:** Analysis of emerging risks to work sites, access routes, and personnel supporting infrastructure operations in contested environments.

DIFFERENTIATORS

- Founded and operated by military and intelligence professionals with firsthand experience in active conflict environments.
- AI-native architecture compresses intelligence gathering and analysis cycles from hours to minutes, measured against manual OSINT workflows.
- Data handling practices aligned to ISO 27001, SOC 2, and GDPR, supporting client information security and data protection requirements.
- Backed by Entree Capital and Parallel VC, and an active member of 47G and the CET Sandbox.
- Built specifically for contested and high-threat operating environments, not adapted from commercial monitoring tools designed for benign conditions.

PAST PERFORMANCE

Military OSINT Situational Awareness Capability

Military client (name withheld for security) | 3-month engagement, full platform access plus discovery of three new regional resources

Delivered advance warnings that supported prevention of 10+ riot incidents during active wartime operations in the Middle East, with near-real-time monitoring across 50+ languages tailored to the client's Area of Responsibility and Priority Intelligence Requirements.

Critical Infrastructure Situational Awareness

Critical infrastructure client (name withheld for security) | 6-month engagement

Delivered operational intelligence supporting electricity infrastructure maintenance teams working in contested areas, helping assess emerging risks around work sites and access routes.
